

Success story of Investigation lead by Forensic D.N.A Examination

Case Details –

District- Jehanabad P.S- Parasbigha Case No- 23/13 Dt- 10.04.2013

This Case relates to Kidnapping of complainant's son who went missing on 03.04.2013. A named FIR was lodged against six suspects for kidnapping his son. The kidnapped person carried a mobile whose call data record gave last position of that kidnapped person. CDR and CAF established the name of person who was in contact with the kidnapped person and have made the last call. I.O identified and reached the place where the kidnapped person was last located. Upon the statement of main suspect it was revealed that the kidnapped person had been killed by the suspects and buried near that place. Partially skeletonized body was recovered from that place on Dated- 12-06-2013.

Forensic Team reached the P.O and seized the skeletal remains of the dead body and the same was sent to F.S.L Patna along with the blood samples of complainant and his wife for D.N.A comparison. The one and only strong evidence in this case was D.N.A examination. Forensic D.N.A examination revealed that the recovered skeleton belonged to the son of the complainant and his wife who went missing since 03.04.2013. It was remarkable achievement for the laboratory, that the skeletal remain recovered in this case were very challenging sample to extract.
